

## 10% Commission Referral Scheme

We're launching a major marketing campaign aimed at bringing some new clients under the fold.

We appreciate that word of mouth is some of the best marketing you can have, and so as part of that campaign, we're pleased to announce a 10% commission referral scheme open to all of our existing customers for any new clients introduced.

We are offering a whopping 10% commission on all consultancy, support, bespoke software design and website design invoices raised against your introducee for the period of 1 year, which will then be credited to your account to apply as a discount against future invoices.

E.g. The commission earned from a web site design introduction could equate to 4 free one hour on site support calls, or a whole year's worth of free server health checks or up to 3 years free web hosting!

What you need to do..

1. Simply recommend us to one of your business contacts and ask if they would mind if you passed us their details.
2. If they agree, send us their contact details and we'll take it from there.
3. Your commission will automatically be applied to your account
4. You will also receive an e-mail every time you earn commission on a settled invoice.

We feel that this incentive, together with our Early Settlement Discount Scheme launched at the beginning of the year, offers fantastic cost saving opportunities and once again demonstrates our continued commitment to our valued clients.

### Terms & Conditions

10% Commission is calculated against the NET value of support, consultancy, software design or web design invoices only. Sorry but due to extremely low margins, software sales, hardware sales, domain registrations and web hosting invoices are excluded. Commission is available for 1 year from the date of the first invoice charged against the introducee. Commission is to be credited to your account and applied as a discount to your future invoices. It is not available as a cash payment. Commission will only be credited to you upon receipt of payment of a qualifying invoice.
